Suggested Text

Established in 2017, the Sustainable 2050 program supports local governments' and partner organizations' sustainability efforts through direct technical assistance, collaboration, and recognition. The Regional Sustainability Agenda provides the framework for Sustainable2050 members and regional partners to work towards common goals.

We work with Sustainable2050 communities to benchmark their sustainability efforts and track their progress in achieving their sustainability goals and objectives. Our work with these communities gives us an understanding of how all efforts make a collective impact on the quality of life in Central Ohio. All MORPC members and prior Central Ohio Green Pact members are eligible to be a Sustainable2050 Community. It's easy – adopt a resolution of participation, and then we can begin working together on your sustainability initiatives.
